

Hi there I am a XM Radio Subscriber and I enjoy it very much. Normal radio angers me and wears me out with their commercials and talk radio. With XM, I don't have to deal with it. I put on my music channels and that's it. If I need the weather and traffic I have that too. I pay for the service that XM gives me, so I do not agree with there being limitations. If the normal radio stations were any good or provided the services I have with XM then maybe they wouldn't be attempting to rock the boat. I pay for it so they should back off.
